

Litter Control Plan

Washville Car Wash – 991 W Main Rd, Middletown RI

The intent of this document is to detail Washville's Litter Control plan as part of ongoing site maintenance

Trash Removal

- On site staff will at a regular interval (hourly) walk the entire site to look for and pick up any litter or discarded items on the property. These items will be disposed of in trash receptacles located at the vacuum stalls.
- Any litter seen by staff outside of the designated site walk times will immediately be picked up and placed in a proper receptacle.
- Each vacuum stand contains one trash bin for the use of customers. On site staff at a regular interval (hourly) will walk the vacuum stall area and assess if the trash receptacles need to be emptied.
- Any trash receptacle on site will be emptied if at 75% capacity during regular intervals of staff walking the site. If any trash receptacle is found to be full in between regular site walks it will immediately be emptied.
- All outdoor trash receptacles are to be emptied into the provided front load dumpster located as shown on the site plans in the sites trash enclosure at the regular site walks.
- Dumpsters and Recycling bins to be picked up biweekly on a regular schedule as needed by a trash removal company.
