RE: Availability of Water Service
991&995 West Main Road, Middletown

Dear Ms. Small,

The Department of Utilities has reviewed the referenced request pertaining to the commercial development at 991 & 995 West Main Road as proposed per your December 4, 2018 and September 18, 2019 correspondence. The purpose of this letter is to advise you that water service can be accommodated for the parcel. Due to the proposed carwash and indication of a grease trap on the plans, an application with the City's Industrial Pretreatment Program is required to confirm that any waste discharge that will be treated at the City's wastewater treatment plant is in compliance with the program.

Please be advised that this letter does **not** constitute approval of any aspect of the actual water service connection including size and location. A water service application is required to be submitted for review and approval.

Very Truly Yours,

Julia A. Forgue
Director
